How the Agni kawach Works?

In just 3 to 5 seconds after contact with the flame, the blaster located inside the product is activated. An immediate burst is caused, the extinguishing powder spreads over an area of 3 to 4 Cubic meters. This pushes the oxygen outside the fire zone, resulting in fire going out instantly. The extinguishing agent then spreads on the burning material, which definitively breaks the Source of combustion.

No training or skill is required to use the Agni kawach. It is accessible to everyone.

How to Use Agni Kawach?

Just simply throw or roll the ball towards the fire. The Blaster will get activated automatically and instantly spread the extinguishing agent to extinguish the fire without risking anyone's life. If a fire breaks out in an unoccupied room, the Agni Kawach will activate in contact with the fire. With a big boom to alert everyone nearby to its extinguishing action. With this feature, the Agni Kawach can be placed in any location presenting a fire risk, such as in your kitchen, or above the often overloaded sockets, near an electrical cabinet, in the storage room in hospital, in school, in industries...in short, everywhere and everything you want to protect.
